Summary

My name is HARIKRISHNAN KB. Currently pursuing B.Tech in Computer Science Engineering from College of Engineering and Management Punnapra, Under Kerala Technological University. Currently I am a second-year student completing 4th semester.

My passion for programing and web designing had always dragged me to do something new & this drag had brought me here. I'm a BTech student and I wish to make use of my passion for innovative creations. Ever since my childhood, I was interested in coding & was always keen to do something different.

I'm glad that I had already got some projects on webdesigning and is looking forward for more opportunities. My friend and I developed a freelancing team called wovenwebs.ml . With its help webdesigning is being done as freelancing. I strongly believe that my quest to explore my passion is the strength behind my success. I'm also confident that it would help me to make my works better. All My projects are available at git hub and those who wish to go through it, kindly visit my github account.
